**Subject:** RE: Request for new SSID:

Hi Celeste –

The ER at the site was for oil (gasoline) related to surface migration and proximity to a waterway. Rob can reply if he will be using the ER TDD (AoA) or FPN (OPA) funds for that phase.

This SSID request is for subsurface gasoline contamination that is a CERCLA threat due to the potential for explosive vapors and/or VOCs to migrate through vapor intrusion into residential indoor air. There is currently a PRP but START support is anticipated for oversight/assessment activities.

Thank you,

JASON MUSANTE

Hi Ben,  
Will this be a mixed removal action funding or Superfund funds only?  
Thanks, C
